

PRO-BT570

BLUETOOTH® RSM WITH 3.5mm JACK FOR EARPHONE

PROFESSIONAL WIRELESS RSM FOR YOUR COMMUNICATION DEVICE

ProEquip's **PRO-BT570** is a robust Bluetooth® RSM that is design focuses on the user's needs and safety. The device is extremely durable and reliable with proper certification. It can withstand the harshest environmental conditions.

The desktop charging cradle designed for users who are looking for a simple and convenient way of managing the logistics around charging their Bluetooth® speaker microphone.

The Bluetooth® adapter has Bluetooth® version 5, and this brings many benefits. Bluetooth® 5.0's primary benefits are improved speed and greater range. In other words, it's faster and can operate over greater distances than older versions of Bluetooth.

You can use the build in microphone or connect 4-pole headset with microphone. The BT300 will auto detect if external microphone is connected in the 3.5mm jack.

Wireless Earbuds are not included.
