# AMPHENOL PROCOM

#### DESCRIPTION

- Loads/terminations are matched to 50 ohms characteristic impedance. Matched loads provide a termination designed to absorb all the incident power with very little reflection. Terminations are used in a wide variety of systems; any port of a multi-port microwave device that is not involved in the measurement, or in a system, should be terminated in its characteristic impedance in order to ensure an accurate measurement.
- This series of coaxial loads have very low VSWR and are especially suitable for use with:
  - > Power Hybrids.
  - > Isolators.
  - > Coaxial Transmission Lines.
  - > Power Monitors.
  - > Wattmeters.
  - Receiver Multicouplers.
- > The surface of the dummy loads is black anodized.
